# **100 WATTS**

## SINGLE/MULTI OUTPUT AC-DC

## FEATURES:

- Compact 3.3" x 5" x 1.5" Size
- 2 Year Warranty
- Universal 85-264V Input
- 1-4 Tightly-Regulated Outputs
- 0-70°C Operating Temperature RoHS Compliant

• IEC 60601-1 3rd ed. Medical Cert.

IEC 62368-1 2<sup>nd</sup> ed. Certification
IEC 60601-1-2 4<sup>th</sup> ed. EMC

Optional Power Fail Warning

Class B Emissions per EN55011/32

### SRW/SRP-100 SERIES MECHANICAL SPECIFICATIONS

#### APPLICATIONS INFORMATION

- Each output can deliver its rated current but Total Output Power must not exceed 70, 85 or 100W, as determined by the cooling method.
- Generally, adequate cooling is provided when semiconductor case temperatures do not exceed 70°C rise and transformer temperature does not exceed 60°C rise at any specified ambient temperature.
- Sufficient area must be provided around power supply to allow natural movement of air to develop in convection-cooled applications.
- This product is intended for use as a professionally-installed component within information technology, industrial, and medical equipment and is not intended for stand-alone operation
- A minimum load of 10% is required on Output 1 to ensure proper regulation of remaining outputs.
- This product includes only one fuse in the input circuit. In consideration of Clause 8.11.5 of IEC 60601-1:2005, a second fuse may be required in neutral conductor of the end product.
- Peak-to-Peak Output Ripple and Noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip (tip-and-barrel method), 20 MHz bandwidth.
- 8. This product was type-tested and safety-certified using the dielectric strength test voltages listed in Table 6 of IEC 60601-1:2005. In consideration of Clause 8.8.3, care must be taken to ensure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary-to-ground capacitors may need to be disconnected prior to performing a dielectric strength test on the power supply or the end product. It is highly recommended that the DC test voltages listed in DVB.1, Annex DVB of UL 60601-11 st Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- This power supply has been safety-approved and final-tested using a DC dielectric strength test. Please consult factory before performing an AC dielectric strength test.
- Remote-Sense terminals may be used to compensate for cable losses up to 250mV, depending on model. The use of a twisted pair, decoupling capacitors and an appropriately-rated low-impedance capacitor connected across the load will increase noise immunity.
- 11. Maximum screw penetration into chassis mounting holes is 0.125 inches.
- To comply with emissions specifications, all four mounting hole pads must be electrically connected to a common metal chassis. Chassis/Cover option is recommended. Refer to Operating Instructions for additional information.
- Common RF shielding precautions may need to be taken to assure emissions compliance. Refer to Operating Instructions for additional information.
- Power Fail (AC-Good) feature provides a logic-low warning signal from an open collector transistor output 2ms prior to loss of output from AC failure.
- 15. Forced-Air cooling rating of 100W requires an air speed of 200LFM flowing past a point one inch above the main isolation transformer.
- Baseplate cooling rating of 85W requires a one-square-foot 0.09"-thick aluminum area attached to bottom four mounting holes.
- 17. Rated 8A maximum when convection cooled only.
- 18. Rated 1A maximum when convection cooled only.
- Rated 50W maximum output power when convection cooled; 70W when baseplate or forced-air cooled(66W SRW-100-1009).

#### MAXIMUM OUTPUT POWER vs. AMBIENT TEMPERATURE

CONNECTOR SPECIFICATIONS P1 AC Input Terminal block with 4-40 inch screws on 0.325 inch centers (Single) with #4 spade terminals. P1 AC Input 0.156 friction lock header mates with Molex 09-50-3031 or (Multiple) equivalent crimp terminal housing with Molex 08-50-0189 or equivalent crimp terminal P2 DC Output 6-32 screw down terminal mates with #6 ring tongue (Single) terminal. (10 in-lb max.) P2 0.156 friction lock header mates with Molex 09-50-3101 or DC Output (Multiple) equivalent crimp terminal housing with Molex 08-50-0189 or equivalent crimp terminal. Ground 0.187 quick disconnect terminal. G P3 0.100 friction lock header mates with Molex 22-01-2047or **Option/Sense** (Single) equivalent crimp terminal housing with Molex 6459 or equivalent crimp terminal. 0.100 friction lock header mates with Molex 22-01-2027or P3 Option (Multiple) equivalent crimp terminal housing with Molex 6459 or equivalent crimp terminal.
