## 4 )0 WATTS

## SINGLE OUTPUT AC

## FEATURES:

- Compact 3.9" x 8.0" x 1.5" Size
- 3 Year Warranty
- Universal 85-264V Input •
- Single High Efficiency Output
- **Power Fail Warning** •
- 0-70°C Operating Temperature
- RoHS Compliant

٠

• IEC 60601-1-2 4th ed. EMC • Class B Emissions per EN55011/32 • Optional Single Wire Load Sharing

• IEC 60601-1 3rd ed. Medical Cert.

• IEC 62368-1 2<sup>nd</sup> ed. Certification

- Optional Remote Inhibit/Enable
  - Optional Chassis/Cover

2012 SI No. 3032 + 2019 SI No.492

## MODEL LISTING

	OPEN FRAME		CHASSIS/COVER	
MODEL	300 LFM	CONVECTION COOLED	300 LFM	CONVECTION COOLED
NXT-400-1001	2.5V/80.0A	2.5V/45.0A	2.5V/72.0A	2.5V/40.5A
NXT-400-1002	3.3V/80.0A	3.3V/45.0A	3.3V/72.0A	3.3V/40.5A
NXT-400-1003	5V/80.0A	5V/45.0A	5V/72.0A	5V/40.5A
NXT-400-1004	12V/33.3A	12V/18.8A	12V/29.9A	12V/16.9A
NXT-400-1005	15V/26.7A	15V/15.0A	15V/24.0A	15V/13.5A
NXT-400-1006	24V/16.7A	24V/9.4A	24V/15.0A	24V/8.5A
NXT-400-1007	28V/14.3A	28V/8.0A	28V/12.8A	28V/7.2A
NXT-400-1008	48V/8.3A	48V/4.7A	48V/7.5A	48V/4.2A

Please refer to Output Power Derating chart.

#### **ORDERING INFORMATION**

Consult factory for alternate output configurations. Please specify the following optional features when ordering:

CH - Chassis

CO - Cover

RE - Remote Inhibit LS - Single Wire Load Sharing

LSEVB - Load Share Evaluation Board

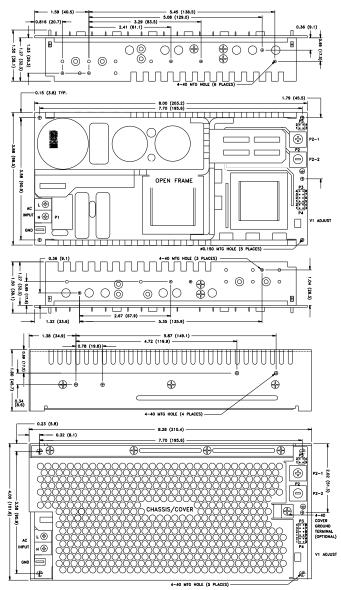

All specifications are maximum at 25°C/400W unless otherwise stated, may vary by model and are subject to change without notice.

# NXT-400

OUTPUT SPECIFICATIONS						
Output Power at 50°C(1)	225W	Convection Cooled, Open Frame				
(See Derating Chart)	400W	300LFM Forced-Air Cooled(15)				
Power Derating	2.5 Wout / 1 Vin	below 100 VIN				
Voltage Centering	± 0.5%	(50% load)				
Voltage Adjust Range	95-105%	(0.100)/ load at arres				
Load Regulation Source Regulation	0.5%	(0-100% load change)				
Noise	1.0% or 100mV	Whichever is greater				
Turn on Overshoot	None					
Transient Response		to within 1% of initial set point due to a 50%				
·		, 500µS maximum, 4% maximum deviation.				
Overvoltage Protection		n 110% and 150% of rated output voltage.				
Overpower Protection		Pout, cycle on/off, auto recovery				
Hold Up Time	16ms min., Full Power, 85-264V Input 3 Seconds, 120V Input					
Start Up Time 3 Seconds, 120V Input INPUT SPECIFICATIONS						
Protection Class						
Source Voltage	85 - 264 Volts A	C				
Frequency Range	47 – 63 Hz					
Input Protection(5)	Internal 10A Time	e Delay fuse				
Peak Inrush Current	50A (cold)	Devenue de la constante				
Efficiency Power Factor	0.95 (Full Power	Power varies by model 230V), 0.98 (Full Power, 120V)				
		ECIFICATIONS				
Ambient Operating	0°C to + 70°C					
Temperature Range	Derating: See Po	wer Rating Chart				
Thermal Shutdown	Output voltage is	inhibited during excessive internal				
	temperatures, au	tomatic reset.				
Ambient Storage Temp. Range	- 40°C to + 85°C					
Operating Relative Humidity Range	20-90% non-con					
Altitude	3,000m ASL - Op 12,192m ASL - N					
Temperature Coefficient	0.02%/°C					
Vibration		Hz per MIL-STD-810F Method 514.5				
Shock	20g, peak per MI	L-STD-810F Method 516.5				
GENE	RAL SPECIF	ICATIONS

#### CONNECTOR SPECIFICATIONS

P1	AC Input	Terminal block with 6-32 screws on 0.325 centers mates with #6, spade terminals. (8 in-lb max)
P2 OUTPUT 1 (-)	DC Output	10-32 screw down terminal mates with #10 ring tongue terminal. (10 in-lb Max)
P3         8         SENSE (-)           SHARE BUS         4         ■         8         SENSE (-)           ENABLE         3         ■         0         7         SENSE (-)           OUTPUT 1 (+)         2         ■         0         0         OUTPUT 1 (-)           SENSE (+)         1         ■         ■         5         SENSE (-)	Load Share, Sense	0.100 friction lock header mates with Molex 22-55-2081 or equivalent crimp terminal housing with Molex 71851 or equivalent crimp terminal.
P.F. RTN 2 • • 4 P.F. RTN P.F. SIG (+) 1 • • 3 P.F. SIG (+)	Power Fail	0.100 friction lock header mates with Molex 22-55-2041 or equivalent crimp terminal housing with Molex 71851 or crimp equivalent terminal.
P5 INHIBIT RTN 2 INHIBIT 1 3 STBY PWR (+) 3 STBY PWR (+)	Inhibit, Standby Power	0.100 friction lock header mates with Molex 22-55-2041 or equivalent crimp terminal housing with Molex 71851 or equivalent crimp terminal.
	Ground	0.187 quick disconnect terminal.

## **APPLICATIONS INFORMATION**

- 1. Continuous Output Power must not exceed 400W.
- Generally, adequate cooling is provided when semiconductor case temperatures do not exceed 70°C rise and transformer temperature does not exceed 60°C rise at any specified ambient temperature.
- Sufficient area must be provided around power supply to allow natural movement of air to develop in convection-cooled applications.
- 4. This product is intended for use as a professionally-installed component within information technology, industrial, and medical equipment and is not intended for stand-alone operation.
- This product includes only one fuse in the input circuit. In consideration of clause 8.11.5 of IEC 60601-1:2005, a second fuse may be required in neutral conductor of the end product.
- Peak-to-Peak Output Ripple and Noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip (tip-and-barrel method), 20MHz bandwidth.
- 7. This product was type-tested and safety-certified using the dielectric strength test voltages listed in Table 6 of IEC 60601-1:2005. In consideration of Clause 8.8.3, care must be taken to insure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary-to-ground capacitors may need to be disconnected prior to performing a dielectric strength test on the power supply or the end product. It is highly recommended that the DC test voltages listed in DVB.1, Annex DVB of UL 60601-1 1st Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- This power supply has been safety-approved and final-tested using a DC dielectric strength test. Please consult factory before performing an AC dielectric strength test.
- Remote-Sense terminals may be used to compensate for cable losses up to 400mV depending on model. The use of a twisted pair, decoupling capacitors and an appropriately-rated lowimpedance capacitor connected across the load will increase noise immunity.
- Maximum screw penetration into bottom chassis mounting holes is 0.100 inches. Maximum screw penetration into side chassis mounting holes is 0.250 inches.
- To comply with emissions specifications, all four mounting hole pads must be electrically connected to a common metal chassis. Chassis/Cover option is recommended. Refer to Operating Instructions for additional information.
- Common RF shielding precautions may need to be taken to assure emissions compliance. Refer to Operating Instructions for additional information.
- Power Fail (AC-Good) feature provides a logic-low warning signal from an open collector transistor output 10ms prior to loss of output from AC failure.
- 14. 300LFM of airflow must be maintained one inch above the top of the heatsinks in any direction in open-frame forced-air applications; and one inch above and toward any of the three perforated sides of the cover in forced-air Chassis/Cover applications.
- 15. Low forward-voltage-drop oring diodes must be used in all load-sharing applications in 2.5 through 15V models. Oring diodes must be used on 24 through 48V models used in fault-tolerant applications but are optional in power-boosting applications. Oring diode power dissipation must be subtracted from the maximum output-power rating of each model.
- 16. Current-carrying conductors in load-sharing applications must be short and symmetrical.
- 17. Refer to Load-Share Evaluation Board data sheet for additional load-share applications information.
- A load equal to 5% rated output power must be maintained when using Standby Power option. An external electrolytic capacitor across standby power output may be used to improve transient response.

#### MAX Pout vs. AMBIENT TEMPERATURE/INPUT VOLTAGE

**Derating requirements** – Chart above applies to models 1003 thru 1008 only. 400W 300LFM forced air, open frame. 225W convection cooled open frame. Derate 10% with chassis and cover. Derate 2.5Wour/1V<sub>IN</sub> below 100V<sub>IN</sub> and between 100V<sub>IN</sub> and 85V<sub>IN</sub>. Use larger of the two deratings when using chassis/cover below 100V<sub>IN</sub>. Derate output power linearly to 50% between 50° and 70°C.

## TYPICAL LOAD SHARE/REMOTE SENSE APPLICATION
