# **400 WATTS**

## SINGLE OUTPUT AC-DC

### FEATURES:

- Compact 4.06" x 9.4" x 1.8" Size IEC 60601-1 3rd ed. Medical Cert.
  - IEC 62368-1 2<sup>nd</sup> ed. Certification
- 3 Year Warranty Universal 85-264V Input
- Single High Efficiency Output
- Power Fail Warning
- IEC 60601-1-2 4th ed. EMC
- Class B Emissions per EN55011/32
- 0-70°C Operating Temperature
- RoHS Compliant

#### **ORDERING INFORMATION**

Consult factory for alternate output configurations.

NXT-400-1007-FN

All specifications are maximum at 25°C/400W unless otherwise stated, may vary by model and are subject to change without notice.

# T-400-FN **OUTPUT SPECIFICATIONS** 400W

OUTF		e/mone		
Output Power at 50°C(1)	400W	400.1/		
Power Derating	2.5 WOUT / 1 VIN			
Voltage Centering	± 0.5%	(50% load)		
Voltage Adjust Range	95-105%	(0.4000) (		
Load Regulation	0.5%	(0-100% load change)		
Source Regulation	0.5%			
Noise	1.0% or 100mV	Whichever is greater		
Turn on Overshoot	None			
Transient Response		to within 1% of initial set point due to a 50%		
		500µS maximum, 4% maximum deviation.		
Overvoltage Protection		n 110% and 150% of rated output voltage.		
Overpower Protection		Pout, cycle on/off, auto recovery		
Hold Up Time	16ms min., Full Power, 85-264V Input			
Start Up Time 3 Seconds, 120V Input INPUT SPECIFICATIONS				
	JT SPECIFIC	CATIONS		
Protection Class				
Source Voltage	85 - 264 Volts A	0		
Frequency Range	47 – 63 Hz			
Input Protection(3)	Internal 10A Time	e Delay fuse		
Peak Inrush Current	50A (cold)			
Efficiency	85% Typical, Full	Power varies by model		
Power Factor		230V), 0.98 (Full Power, 120V)		
ENVIRONI	MENTAL SP	ECIFICATIONS		
Ambient Operating	0°C to + 70°C			
Temperature Range	Derating: See Po	wer Rating Chart		
Thermal Shutdown		inhibited during excessive internal		
	temperatures, automatic reset.			
Ambient Storage Temp. Range	- 40°C to + 85°C			
Operating Relative Humidity Range	20-90% non-condensing			
	3,000 ASL - Ope			
Altitude	12,192m ASL – N			
Temperature Coefficient	0.02%/°C

Voltage Fluctuations/Flicker EN 61000-3-3 Compliant

#### NXT-400 SERIES MECHANICAL SPECIFICATIONS

ALL DIMENSIONS IN INCHES (mm)

#### CONNECTOR SPECIFICATIONS

**AC INLET:** IEC 320 C14 mates with AC power cable C13 or equivalent AC power cable.

**P2:** 10-32 screw down terminal mates with #10 ring tongue terminal. (10 in-lb Max)

**P3.** 0.100 friction lock header mates with Molex 22-55-2081 or equivalent crimp terminal housing with Molex 71851 or equivalent crimp terminal.

**P4.** 0.100 friction lock header mates with Molex 22-55-2041 or equivalent crimp terminal housing with Molex 71851 or crimp equivalent terminal.

#### APPLICATIONS INFORMATION

- 1. Continuous Output Power must not exceed 400W.
- This product is intended for use as a professionally-installed component within information technology, industrial, and medical equipment and is not intended for stand-alone operation.
- This product includes only one fuse in the input circuit. In consideration of clause 8.11.5 of IEC 60601-1:2005, a second fuse may be required in neutral conductor of the end product.
- Peak-to-Peak Output Ripple and Noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip (tip-and-barrel method), 20MHz bandwidth.
- 5. This product was type-tested and safety-certified using the dielectric strength test voltages listed in Table 6 of IEC 60601-1:2005. In consideration of Clause 8.8.3, care must be taken to insure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary-to-ground capacitors may need to be disconnected prior to performing a dielectric strength test on the power supply or the end product. It is highly recommended that the DC test voltages listed in DVB.1, Annex DVB of UL 60601-1 1st Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- This power supply has been safety-approved and final-tested using a DC dielectric strength test. Please consult factory before performing an AC dielectric strength test.
- Remote-Sense terminals may be used to compensate for cable losses up to 400mV depending on model. The use of a twisted pair, decoupling capacitors and an appropriately-rated lowimpedance capacitor connected across the load will increase noise immunity.
- 8. Maximum screw penetration into bottom chassis mounting holes is 0.100 inches.
- Common RF shielding precautions may need to be taken to assure emissions compliance. Refer to Operating Instructions for additional information.
- Power Fail (AC-Good) feature provides a logic-low warning signal from an open collector transistor output 10ms prior to loss of output from AC failure.

## Derating requirements

-Derate 2.5Wout/1Vin below 100Vin and between 100Vin and 85Vin. -Derate output power linearly to 40% between 50° and 70°C.
