Report on our response to change of UL registered product number of DIC Corporation PPS  
product materials

Dear Valued Customers,

We are pleased to hear of the continued prosperity of your company.

We would like to thank you for your continued patronage.

DIC Corporation (hereinafter referred to as "DIC") has informed us that there were deficiencies in the certification procedures of Underwriters Laboratories (hereinafter referred to as "UL"), a third-party safety science organization in the United States, for some PPS compound materials, and that the UL registered product names will be changed.

We will therefore report on our future measures for our products that use the subject material.

1 Target products

Please refer to the attached sheet.

2 DIC's explanation to us (Please refer to the attached DIC letter for details)

This is a notice of product number changeover due to re-registration of UL registered materials.

We have received an explanation that the product has the same content (same composition, same performance) before and after the product number changeover.

3 Our response to the affected products

Based on the report from DIC, we will take the following actions

- We will switch to a new product number with the same composition that has newly acquired UL certification.
- We will continue to use UL94V-0 certified materials for our products.
- Please contact us if you wish to have the material certification reissued.
- Our products with UL certification are currently under application to UL to maintain the certification.
- We are currently consulting with UL Market Surveillance regarding the handling of our products that use materials for which UL certification information will be deleted.

We sincerely apologize for any inconvenience caused.

We highly appreciate your understanding and cooperation.

Report on deficiencies in UL certification procedures for DIC.PPS compound products
