Description

Based on the CTS 219 series' design the 219G series features gold plated terminals making it well suited for harsh outdoor environments. Positive detent separated from contactor causes contactor does not deflect during actuation. Unique compact type design allows to be used at small size application. Optional top tape sealed structure is optimized for board washing during soldering process. It makes it the ideal choice for any server, security and HVAC systems.

CTS SERIES 219G SMT CONTACT FEATURES

- 1. Value of Redundant (Bifurcated) Gold Plated Contacts: Redundancy dramatically reduces the probability of contact failure while gold contact material provides the highest environmental protection, IMPROVING RELIABILITY.
- 2. Value of Wiping Contact Action: Clean contact area, IMPROVING RELIABILITY
- 3. Value of Contactor Not Deflecting During Actuation: Constant contact pressure eliminates overstressing contacts, IMPROVING RELIABILITY.
- 4. Value of Detent Separate from Contactor: Separate detent allows optimization of nondeflecting contactor and detent designs, IMPROVING RELIABILITY.
