Subject: Change notification

This letter serves as a notice about Portescap's decision to implement certain material change on the motor part numbers being currently supplied to you:

35DBM10B2U-K
35DBM10B2U-L
35L048B1B
35L048B1U
35L048B2U
42M048C2B-R21
42M100B1B

To improve our overall supply chain efficiency, we intent to eliminate the use of current Electroless Nickel plated motor "cups" and replace these with Electrolytic Zinc pre-pated material, the Zinc material is REACH ROHS compliant. This change would not impact form, fit and function of the motor. The main factor that led to this decision is Increased raw material and production cost of the "plating process" and availability of the better option in the form of pre-plated raw material.

New

Current

The below picture represents the aesthetic view of the said change (only representation purpose).

The above-mentioned change shall be applicable to all the shipments after October 1st, 2023. (Including the existing and new purchase orders)

Please feel free to reach out to your local Portescap representative in case of any questions or need further assistance.

Sincerely yours,

Anant Bhalerao
Deputy General Manager- Product Management

PORTESCAP
