

Click[™]/Slide[™] Combo for Raspberry Pi Zero

Spend less time figuring out how to mount components and more time connecting and programming.

"All I want to say is...as a person that has been prototyping for 35+ years, *this is the best setup I have ever worked with.*Thank you."

- LEWIS T., SAN ANTONIO, TX

Less Frustration. More Innovation.

Slide adapters are an elegant and convenient way to mount a Raspberry Pi Zero, or any other board with the same mounting hole configuration.

Once mounted on a Click/Slide combo, your Raspberry Pi can be snapped onto your Phase Dock WorkBenchTM within seconds. Organize and rearrange your project or prototype easily.

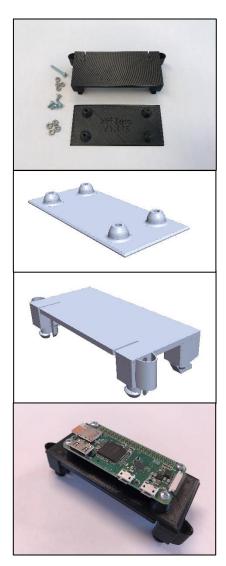

Or, deploy the Slide without the Click as a more permanent mounting platform. The raised bosses protect the vulnerable components on the underside of the Raspberry Pi board against scraping or damage. Plus, you get the convenience of easy on and off.

Hex nuts installed in the raised bosses enable you to attach and remove electronics over and over without damaging the Slide.

| Item | Qty | Specifications | Purpose |
|--------------|-----|---------------------------|--------------------------|
| Raspberry Pi | 1 | 1.56" x 3.36" | Mount and protect any |
| Zero Slide | | (40mm x 85.4mm) | board with same mounting |
| | | 3D-printed ABS | hole configuration as |
| | | | Raspberry Pi Zero. |
| 1x3 Click | 1 | 1.56" x 3.36" | Attach to Universal |
| | | (40mm x 85.4mm) | WorkBench base. |
| | | 3D-printed ABS | |
| Hardware | 1 | 4 M2.5 hex nuts | Click/Slide assembly |
| Packet | | 4 M3.0 hex nuts | |
| | | 1 M2.5 x 20 machine screw | Hex nut insertion tool |
| | | 4 M2.5 x 8 machine screws | Attach electronics |

Electronics Mounting Guide

No matter what electronic component you use, there is a way to mount it on the Universal WorkBench. Download the Electronics Mounting Guide eBook at https://www.phasedock.com/electronics-mounting-guide

Electronics not included.
