Item description

Male connector/plug *WINSTA*® MIDI with protection against mismating

The *WINSTA*® MIDI male connector/plug B coding are compact but outstanding PCB terminal blocks. They offer easy operation and the greatest flexibility for installation. Our pluggable PCB connectors give you a universal pluggable connection system for your devices that meets all the requirements for a robust device connection that is easy to put into operation. The mechanical coding and color coding of the pcb connectors ensure error-free installation of the individual components – including protection against mismating. B coding enables the *WINSTA*® MIDI pcb connectors to be used for application control in the domains of automation, robotics, and mechanical engineering. This pcb connectors can be used for a current load of up to 25 A. As a result, pcb connectors can also be used for high power loads. Our *WINSTA*® MIDI product line offers flexibility for the installation. With its Push-in CAGE CLAMP® spring pressure connection technology, it achieves error-free, time-saving installation and offers customization for meeting all installation requirements.

Lower costs through fast commissioning and elimination of service expenses – solutions from *WINSTA*® MIDI

The *WINSTA*® Pluggable Connection System allows pluggable electrical installation. This saves time, lowers costs, and reduces the need for servicing. Choose quality and durability – with locking lever from WAGO makes the installation of electrical components significantly easier.

- effective protection against mismating
- pre-assembled versions
- with B coding for controllers such as lighting fixtures and sun blinds
- convenient installation and commissioning
