WAGO has various connection solutions for any challenge in building installation, for example, the *WINSTA®* MINI male connector/plug. The pluggable PCB connectors with spring pressure connection technology and Push-in CAGE CLAMP® technology from WAGO allow fast, vibration-proof, maintenance-free terminal connections. The mechanical coding and color coding of the pcb connectors ensure error-free installation of the individual components – including protection against mismating. *WINSTA®* MINI pcb connectors with I coding in blue are especially suitable for intelligent, for example for the dimming function of DALI lights. Due to its particularly small dimensions, our *WINSTA®* MINI Pluggable Connection System with Push-in CAGE CLAMP® spring pressure connection technology is specifically suitable in very tight spaces, i.e., for installations when very little room is available.

#### WINSTA® MINI solutions for your electrical installation – protected against mismating and maintenance-free

The WINSTA® Pluggable Connection System allows pluggable electrical installation. This significantly reduces the need for servicing and lowers costs. Now you can also cut installation expenses without compromising quality and safety: with marking eliminates the need for servicing and prevents unnecessary downtime.

- pcb connectors with protection against mismating
- compact design for conductors with a cross-section up to 1.5 mm²
- for intelligent, easy lighting installation
- convenient installation and commissioning
