

## Description

The AS324/324A consist of four independent, high gain and internally frequency compensated operational amplifiers. They are specifically designed to operate from a single power supply. Operation from split power supplies is also possible and the low power supply current drain is independent of the magnitude of the power supply voltage. Typical applications include transducer amplifiers, DC gain blocks and most conventional operational amplifier circuits.

The AS324/324A series are compatible with industry standard 324. The AS324A has more stringent input offset voltage than AS324.

The AS324 is available in SO-14 and TSSOP-14 packages, and the AS324A is available in SO-14 package.

## Features

- Internally Frequency Compensated for Unity Gain
- Large Voltage Gain: 100dB (Typical)
- Low Input Bias Current: 20nA (Typical)
- Low Input Offset Voltage: 2mV (Typical)
- Low Supply Current: 0.5mA (Typical)
- Wide Power Supply Voltage Range:
  - Single Supply: 3V to 36V
  - Dual Supplies:  $\pm 1.5V$  to  $\pm 18V$
- Input Common Mode Voltage Range Includes Ground
- Large Output Voltage Swing: 0V to  $V_{CC} - 1.5V$
- Power Drain Suitable for Battery Operation
- Lead-Free Packages: SO-14, TSSOP-14
  - **Totally Lead-Free; RoHS Compliant (Notes 1 & 2)**
- Lead-Free Packages, Available in "Green" Molding Compound: SO-14, TSSOP-14
  - **Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)**
  - **Halogen and Antimony Free. "Green" Device (Note 3)**

- Notes:
1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS), 2011/65/EU (RoHS 2) & 2015/863/EU (RoHS 3) compliant.
  2. See <https://www.diodes.com/quality/lead-free/> for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
  3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

## Pin Assignments

## Applications

- Battery Charger
- Cordless Telephone
- Switching Power Supply

**Typical Applications Circuit**

Battery Charger

DC Summing Amplifier

Power Amplifier

**Typical Applications Circuit** (continued)

Fixed Current Sources

AC Coupled Non-Inverting Amplifier

Pulse Generator

DC Coupled Low-Pass RC Active Filter

**Functional Block Diagram**

**Absolute Maximum Ratings** (Note 4)

Symbol	Parameter	Rating	Unit
V <sub>CC</sub>	Supply Voltage	40	V
V <sub>ID</sub>	Differential Input Voltage	40	V
V <sub>IN</sub>	Input Voltage	-0.3 to 40	V
P <sub>D</sub>	Total Power Dissipation (T <sub>A</sub> = +25°C)	SO-14	800
		TSSOP-14	710
T <sub>J</sub>	Operating Junction Temperature	+150	°C
T <sub>STG</sub>	Storage Temperature Range	-65 to +150	°C
T <sub>LEAD</sub>	Lead Temperature (Soldering, 10 Seconds)	+260	°C

Note 4: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

**Recommended Operating Conditions**

Symbol	Parameter	Min	Max	Unit
V <sub>CC</sub>	Supply Voltage	3	36	V
T <sub>A</sub>	Ambient Operating Temperature Range	-40	+85	°C

**Electrical Characteristics** (Limits in standard typeface are for  $T_A = +25^\circ\text{C}$ , **bold** typeface applies over  $T_A = -40^\circ\text{C}$  to  $+85^\circ\text{C}$  (Note 5),  $V_{CC} = 5\text{V}$ ,  $GND = 0\text{V}$ , unless otherwise specified.)

Symbol	Parameter		Conditions	Min	Typ	Max	Unit		
$V_{IO}$	Input Offset Voltage		$V_O = 1.4\text{V}$ , $R_S = 0\Omega$ , $V_{CC} = 5\text{V}$ to $30\text{V}$	AS324	—	2	5	mV	
					—	—	<b>7</b>		
				AS324A	—	2	3	mV	
					—	—	<b>5</b>

				<b>27</b>	—	—			
				mV	$V_{CC} = 5\text{V}$ , $R_L = 10\text{k}\Omega$	—	5	20	mV
						—	—	<b>30</b>	
$\theta_{JC}$	Thermal Resistance (Junction to Case)	SO-14	—	18	—	$^\circ\text{C}/\text{W}$			
		TSSOP-14	—	20	—				
$\theta_{JA}$	Thermal Resistance (Junction to Ambient)	SO-14	—	91	—	$^\circ\text{C}/\text{W}$			
		TSSOP-14	—	133	—				

Notes: 5. Limits over the full temperature are guaranteed by design, but not tested in production.  
6. The input common-mode voltage of either input signal voltage should not be allowed to go negatively by more than 0.3V (at  $+25^\circ\text{C}$ ). The upper end of the common-mode voltage range is  $V_{CC} - 1.5\text{V}$  (at  $+25^\circ\text{C}$ ), but either or both inputs can go to  $+36\text{V}$  without damages, independent of the magnitude of the  $V_{CC}$ .

**LIFE SUPPORT**

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
