

Features

- Constant Voltage + Constant Current mode output
- · Circular metal housing with class I design
- Built-in active PFC function
- IP67 / IP65 rating for indoor or outdoor installations
- Function options: output adjustable via potentiometer;
 3 in 1 dimming; DALI
- Typical lifetime>50000 hours
- 5 years warranty

Applications

- LED high/low bay lighting
- LED canopy lighting
- LED stage lighting
- · LED spot lighting
- Outdoor architectural lighting system
- Type "HL" for use in Class I, Division 2 hazardous (Classified) location.

■ Description

HBG-200 series is a 200W AC/DC LED driver featuring the circular shape design. It operates from $90{\sim}305$ VAC and offers the dual modes constant voltage and constant current output models with different rated voltage between 36Vand 60V. Thanks to the high efficiency up to 93.5%, with the fanless design, the entire series is able to operate for $-40^{\circ}\text{C} \sim +85^{\circ}\text{C}$ case temperature under free air convection. The design of metal housing and IP67/IP65 ingress protection level allows this series to fit both indoor and outdoor applications. HBG-200 is equipped with various function options, such as dimming methodologies, so as to provide the optimal design flexibility for LED lighting system.

■ DRIVING METHODS OF LED MODULE

X This series is able to work in either Constant Current mode (a direct drive way) or Constant Voltage mode (usually through additional DC/DC driver) to drive the LEDs.

Typical output current normalized by rated current (%)

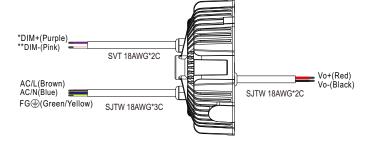

In the constant current region, the highest voltage at the output of the driver depends on the configuration of the end systems.

Should there be any compatibility issues, please contact MEAN WELL.

■ DIMMING OPERATION

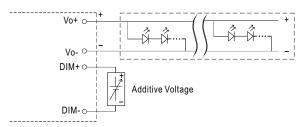

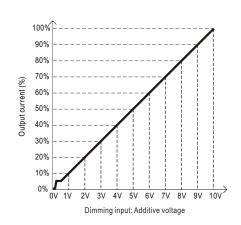

※ 3 in 1 dimming function (for B/AB-Type)

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-: $0 \sim 10 \text{VDC}$, or 10 V PWM signal or resistance.
- $\bullet \ \, \text{Direct connecting to LEDs is suggested. It is not suitable to be used with additional drivers. }$
- Dimming source current from power supply: $100\mu A$ (typ.)

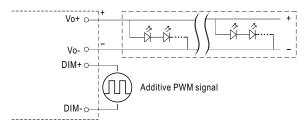

O Applying additive 0 ~ 10VDC

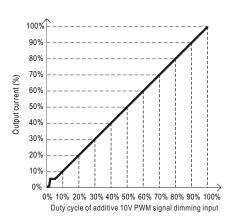

"DO NOT connect "DIM- to -V"

 \bigcirc Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

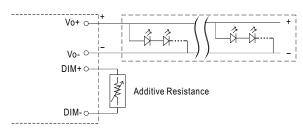

"DO NOT connect "DIM- to -V"

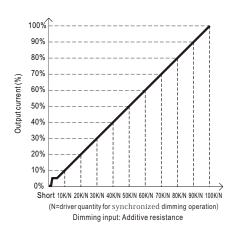

O Applying additive resistance:

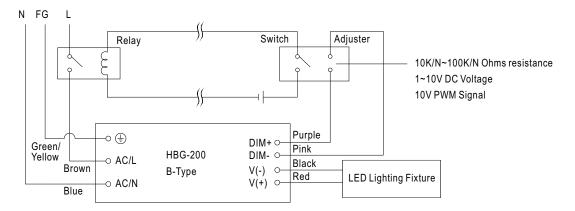

"DO NOT connect "DIM- to -V"

 $Note: 1.\ Min.\ dimming\ level\ is\ about\ 8\%\ and\ the\ output\ current\ is\ not\ defined\ when\ 0\%< Iout<8\%.$

2. The output current could drop down to 0% when dimming input is about 0k Ω or 0Vdc, or 10V PWM signal with 0% duty cycle.

Note: In the case of turning the lighting fixture down to 0% brightness, please refer to the configuration as follow, or please contact MEAN WELL for other options.

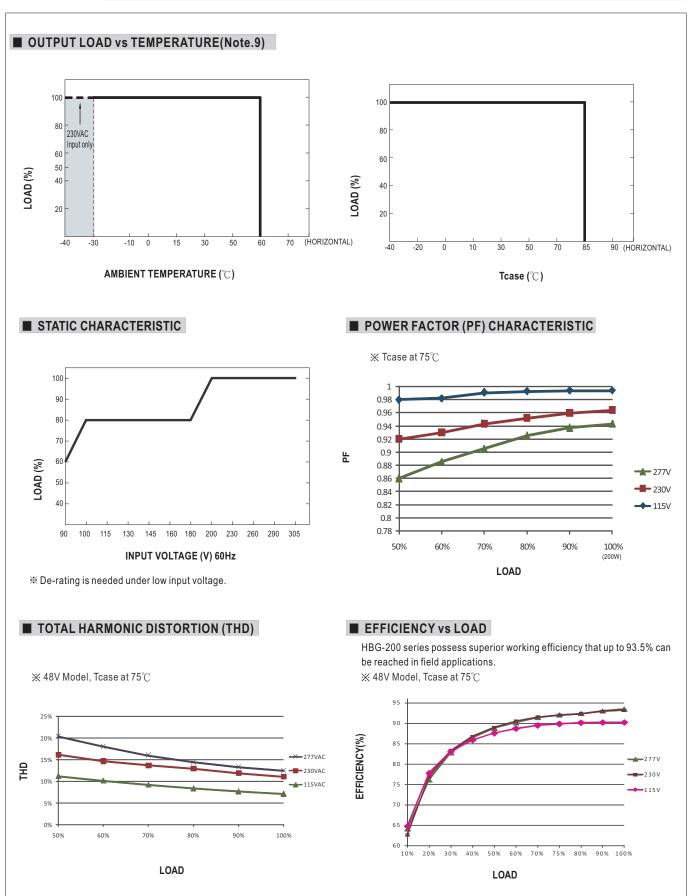

Using a switch and relay can turn ON/OFF the lighting fixture.

X DALI Interface (primary side; for DA-Type)

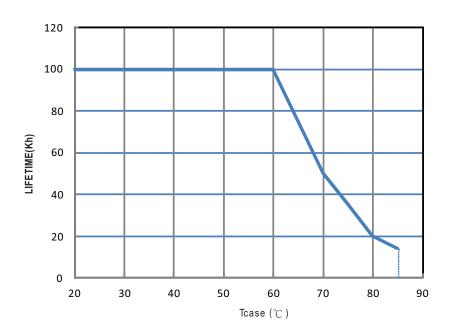

- · Apply DALI signal between DA+ and DA-.
- DALI protocol comprises 16 groups and 64 addresses.
- First step is fixed at 8% of output.

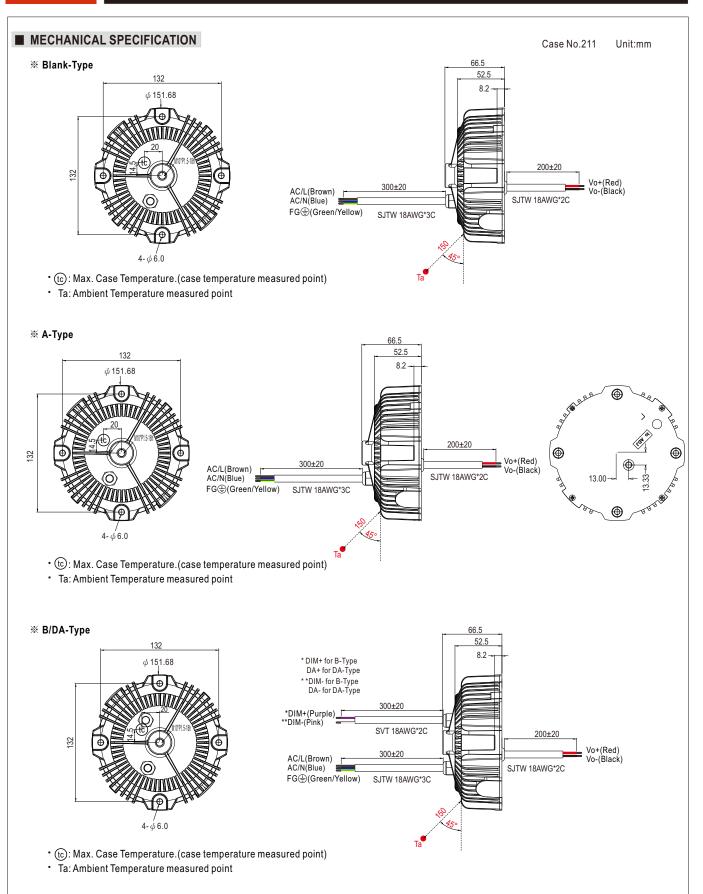

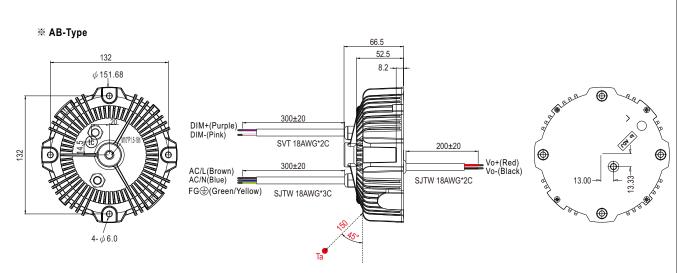

■ LIFE TIME

- (c): Max. Case Temperature.(case temperature measured point)
- Ta: Ambient Temperature measured point

■ INSTALLATIONS

Caution

- Please inspect the appearance of the driver if the package is damaged. There should not be any cracks.
- * Please do not drop or bump the driver.
- * All screws including the suspension screw should be paired with a spring washer and locked tight.
- * The entire luminaire, including the driver, should be limited to 10Kg or less.
- * The luminaire should be cautiously protected from damage due to shock throughout packaging and transportation.
- * Please thoroughly follow the preceding cautionary notes to prevent the luminaire from falling, leading to injuries.
