# 14.4kW 208V 3PH Monitored Per-Outlet PDU - LX Interface, Gigabit, 18 Outlets, 50A CS8365C Input, LCD, 1.8 m Cord, 0U 1.8 m Height, TAA

MODEL NUMBER: **PDU3EVNR6H50A**

3-phase PDU allows real-time remote monitoring of individual outlets to help you track power consumption trends and detect problems early.

Features

14.4kW 3-Phase PDU Distributes and Monitors Network-Grade Power This monitored PDU provides real-time remote monitoring of voltage and load levels via its built-in network interface. Ideal for your data center, computer room or high-density network closet, the PDU3EVNR6H50A features six C13 and 12 C19 208V outlets in six breakered load banks, which distribute AC power to rack equipment. Plug-lock insert sleeves are included to prevent equipment cables from becoming accidentally dislodged.

Monitored Per-Outlet PDU Lets You Keep Track of Power Consumption in Real Time Not only can you remotely monitor voltage and frequency, but the PDU3EVNR6H50A also allows metering of per-phase input current, as well as output current per bank and per outlet. Banks can be individually monitored to ensure proper load balance and prevent downtime. Monitoring each outlet allows you to study power consumption trends for each connected device. This helps you detect hardware problems and network traffic bottlenecks, as well as compare power usage among various devices.

Built-In GbE-Capable Network Management Card Allows Remote Access 24/7 The built-in WEBCARDLX with the latest version of PowerAlert Device Manager firmware (PADM20) provides enhanced remote management capabilities, including customizable dashboard graphs to fit user preferences. The PADM20 upgrade and PowerAlert Element Manager (PAEM) software form a powerful tool for expanding maintenance functions in large installations, including firmware update checks and backup and restoration of device configurations.

Color Touchscreen LCD Gives You Important Data at a Glance An easy-to-navigate color touchscreen LCD reports network data, including IP address, input current level per phase, and output current per load bank and per outlet with ±1% billing-grade accuracy. It also generates a unique QR code to allow read-only access to the PDU via PowerAlert® Device Manager. If an EnviroSense2 module is connected, the LCD also displays status and environmental data, including temperature and humidity.

Easy to Install Vertically in an EIA-Standard 19 in. Rack The 70-inch 0U PDU mounts vertically using the included toolless mounting buttons or the included rack-mounting brackets. Spare buttons are also included. Use the included PDUMVROTATEBRKT kit to install the PDU with outlets facing the rear for better airflow or equipment access. A six-foot cord with a Hubbell 50A CS8365C 208V input connects the PDU to a compatible AC power source, generator or protected UPS.
