Product information

Product identification label for production control

To optimize production processes, the following EPCOS EMC standard products are being given an additional product identification label. This label is intended exclusively for internal production control.

Example 1: Appearance of the label

Example 2: Position of the label on EMC filters

Example 3: Position of the label on chokes and output filters

March 22, 2019

The attachment of the label has no effect on quality of the products concerned or their ability to be processed. The electrical and mechanical properties remain unchanged.

Starting immediately the new production identification labels will be affixed successively to the various types. During a transitional phase it may happen that products are shipped with or without the additional label.

Contact Sarah Guengoer, MAG PEMC PM, Munich

Customers are asked to address inquiries directly to their sales contacts.
