End of Life of Terabee Sensors

Terabee has decided to discontinue a range of sensors as part of a general strategy to focus on People Counting sensors and solutions. The list below shows the part numbers that are being discontinued either immediately or during the course of 2024. Some of the sensors can be purchased with an extra discount incentive based on a MOQ. The discount is to MSRP. Otherwise the usual pricing applies for lower order quantities.

Products with no last order date cannot be ordered.

Let me know if you have any questions.
