

Information on „REACH“

Information on the regulation “**(EC) No. 1907/2006 for the Registration, Evaluation, Authorisation and Restriction of Chemicals**”

(Registration, Evaluation, Authorisation and Restriction of Chemicals - **REACH**)

The “**REACH**” regulation requires that all chemical substances produced in quantities of more than one tonne per year are pre-registered or registered before they can be approved for distribution in the European Union.

RK Rose+Krieger GmbH does not produce any substances affected by this regulation.

We only produce and sell products which are defined as “**products**” and not as “substances” or “mixtures” in accordance with TITLE I, CHAPTER 2, Article 3 (Definitions) of the “**REACH**” regulation. As a “**downstream user**”, **RK Rose+Krieger GmbH** is not subject to registration obligations for “substances”.

Within the scope of our management system, we ensure that what is referred to as the “**SVHC**” list (Substance of **Very High Concern**) of “**ECHA**” (European **C**hemicals **A**gency) is regularly checked for possible updates and compared with the materials we use.

We check and observe the restrictions for use as per “**Annex XVII**” as a matter of course during the development process.

If we ascertain that our products contain “substances” on the “**SVHC** list” with a percentage by weight requiring compulsory information as per “**Article 33**”, we actively comply with this obligation.

According to our current information, we confirm that the “products” produced by **RK Rose+Krieger GmbH** either contain no “substances” on the “**SVHC**” list from 23 January 2024 with critical percentages by weight, or we inform our customers actively ourselves.

Nevertheless, in the interests of both ourselves and our customers, **RK Rose+Krieger GmbH** keeps a register of hazardous substances, in which the annual quantities of chemicals used are recorded and continuously updated.

Please do not hesitate to contact us should you have any further queries.
