**Comments:**

The sensor included with the FG-100B and FG-101B will be changed from 191-212 to the AS5000 Long Life Sensor that provides customers with faster and higher accuracy measurements and approximately 30X longer service life over the 191-212 sensor. The frame material of the AS5000 sensor is also changed to provide greater durability.

This change will occur through our inventory transition and will be completed after the current stock is exhausted.
