Eaton 9PX 8000VA 7200W 208V Online Double-Conversion UPS - Hardwired Input / Output, Cybersecure Network Card, Extended Run, 6U Rack/Tower

MODEL NUMBER: 9PX8KHW

Provides sine wave output, complete battery backup and power protection for mission-critical IT installations, edge networks and other advanced network applications.

Features

8kVA/7.2kW/208V Battery Backup for IT Installations and Edge Networks

This 9PX rack-mount online double-conversion UPS system features hardwired input and output connections. It provides reliable battery backup and AC power protection against blackouts, brownouts, surges and line noise that can damage valuable IT equipment or destroy data. The 9PX8KHW is superlative power management for education, commercial, financial or healthcare networking components, including Cisco switches and servers.

Expandable Battery Backup Keeps You Operational Through Power Outages

Valve regulated lead acid (VRLA) battery modules allow you to work through short power failures and give you enough time to safely save files and shut down your system in case of a prolonged blackout. Exclusive ABM technology increases battery life by 50 percent and closely monitors battery health to provide advanced notice when batteries need replacing. You can also connect up to five extended battery modules (9PXEBM240RT, sold separately) for hours of extended runtime or up to 12 EBMs with the optional 3U rack-mount 240VDC supercharger (SC240RT, sold separately).

Included Gigabit Network Interface Offers 24/7 Remote Access

The NETWORK-M2 Gigabit network card enables full remote configuration and management, including load shedding, reboots of connected equipment and safe shutdowns. UPS firmware can also be flashed remotely through the NETWORK-M2 without dropping the load, so you don't have to plan for downtime. The card meets both UL 2900-1 and IEC 62443-4-2 standards for cybersecurity, which were developed to address the vulnerability of connected devices to known malware/exploits and to protect business from these risks. The optional Environmental Monitoring Probe Gen 2 (EMPDT1H1C2, sold separately) provides a variety of environmental monitoring capabilities, including temperature and humidity conditions.

Rotating LCD Interface Keeps You Informed at a Glance

The intuitive front-panel LCD provides control settings and critical information to help diagnose any issues. The interface rotates to accommodate both rack-mount and tower configurations, and it tilts up to 45 degrees for more comfortable viewing.

Advanced Communications Ports Allow for Automatic Saves and Shutdowns

RS-232 and USB ports connect to a serial-enabled device for a variety of communication options (cables

Highlights

- Keeps equipment running during outages to allow time for file saves and safe shutdown
- Included NETWORK-M2 Gigabit network card enables full remote access and control
- Exclusive ABM technology with 3-stage charging increases internal battery life by 50%
- Interactive LCD interface keeps you updated on critical load information in real time
- Optional extended battery modules allow extended runtime to keep equipment powered

Package Includes

- 9PX8KPM 9PX 3U UPS power module
- 9PXEBM240RT 3U extended battery module
- NETWORK-M2 Gigabit network card
- USB cable
- RS-232 cable
- Cable gland for hardwire connection
- Phillips-head screwdriver
- Rack-mounting hardware
- Owner's manuals

are included). A dry-contact relay port can be programmed through the LCD to provide reliable communications to automation and industrial components. The RPO/ROO connectors permit emergency shutdown or remote restart of all connected equipment.

Versatile Installation Options

You can mount the 9PX8KHW in a tower configuration on a flat, stable surface or in 6U of space in an EIA-standard 19-inch rack using the included 4-post rail kit.
