Converter losses to IEC61800-9-2\*

IE2

39.5 %

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

\*converted values

Efficiency class

Comparison with the reference

converter (90% / 100%)

<sup>1)</sup> The output current and HP ratings are valid for the voltage range 550V-600V

<sup>&</sup>lt;sup>3)</sup>Typical value. More information can be found in the element group "Converter losses to IEC 61800-9-2" in this datasheet.
