

Designed for precision fiber optic stripping, this tool is perfect for stripping the 600 - 1100 micron buffer coating to expose the 250 micron acrylate-coated glass fiber of fiber optic cables. This precision fiber stripper also features the following:

- Precision blades strip the 600 - 1100 micron acrylate coating to expose the 250 micron acrylate-coated glass fiber of fiber optic cables
- Blades are precision ground and hardened for accurate stripping and long life
- 2" (50 mm) scale with 1 mm graduations and length stop to strip fiber to specific lengths
- Compact and lightweight design for maximum portability
